

Introducing ^{VPL}View™

The healthcare industry's first SaaS supply chain visibility platform to enable greater collaboration across the health system

Exceptional visibility into the movement of vital product:

- Lowers costs
- Increases confidence
- Enables better patient care

But when visibility is poor, the facts are clear:

74% of clinicians

are spending time tracking the status of PPI orders, and half of these are investing four or more hours a week doing so

76% of clinicians

don't know if product will arrive in time for a scheduled procedure

84% of clinicians

have seen procedures delayed due to backorders in the last 12 months

Fortunately, ^{VPL}View™ gives you complete visibility into the supply chain and enables you to:

SEARCH

by PO, tracking number, product or buyer

FIND

real-time status of products orders

SEE

and monitor shipments on a map

SUBSCRIBE

to email notifications for important alerts

SHARE

order status with any stakeholder

Take a closer look at View™

VPL View™ reconciles siloed data between suppliers, carriers and providers

By providing stakeholders with insight into order status and movement of vital product from manufacturer to point of patient care, VPL View:

- Improves operational efficiencies
- Mitigates risk
- Increases confidence in the supply chain

VPL View™ features track-and-trace capabilities and proactive alerts

This makes it easy for buyers, supply chain coordinators and clinicians to:

- See the quantity shipped
- Know when and where it will arrive
- Spend less time tracking product

VPL View™ is exceptionally innovative and incredibly easy to adopt

It not only offers an immediate ROI, it also:

- Reduces the long-term impact of disruptions
- Helps ensure health systems are able to maintain a supply of critical products
- Allows you to lower the cost of care and focus on delivering better patient outcomes

Let us show you how VPL View can make a dramatic difference to your bottom line.
